

Aditi Goel

SOFTWARE ENGINEER

✉ aditi2914.goel@gmail.com · 📞 +91 8708881483 · 🌐 aditi-goel-47913628b · 📅 aditi-2004

Professional Summary

Software Engineer with experience in **Full-Stack Development**, **Microservices Architecture**, and **Distributed Systems**. Skilled in building scalable applications using **Java**, **Spring Boot**, **React.js**, and **REST APIs**, with hands-on experience in **Docker**, **GCP**, and modern software development practices.

Skills

Languages: Java, Python, SQL, JavaScript

Backend: Spring Boot, REST API Design, Apache Kafka, Node.js, Microservices Architecture

Frontend: React.js, Tailwind CSS

Cloud & DevOps: Google Cloud Platform (GCP), Docker, CI/CD Pipelines

Databases: PostgreSQL, MySQL, MongoDB, Firebase

AI/ML & NLP: Machine Learning, Natural Language Processing (NLP), Scikit-learn, TF-IDF Vectorization

Tools: Git, GitHub, Postman, PNPM, TurboRepo

Professional Experience

Software Engineer Intern

Dec 2025 – June 2026

Digimantra Labs

Punjab, India

- Engineered and maintained **RESTful microservices** in **Java** and **Spring Boot** across 2 enterprise products, supporting core business workflows through modular service boundaries.
- Integrated **Circuit Breaker**, **Eureka Service Discovery**, and **API Gateway** patterns to strengthen service resilience and routing efficiency.
- Containerized multiple backend workloads using **Docker** and supported deployments on **GCP**, streamlining release consistency across environments.
- Delivered features across database operations, backend APIs, and **React.js** interfaces, contributing to multiple release cycles within an agile team.
- Created reusable UI components using **React.js** and **Tailwind CSS**, reducing duplication and improving consistency across application screens.
- Evaluated **LLM-driven** automation workflows and AI-assisted tooling to support internal productivity initiatives.

Key Projects

Banking Microservices Platform

Java, Spring Boot, Apache Kafka, PostgreSQL, React.js, JWT, Docker, Kubernetes, GCP

- Designed a banking platform comprising 3 independently deployable services (**Customer**, **Account**, **Transaction**) with isolated data ownership and automated delivery pipelines.
- Leveraged **Apache Kafka** for asynchronous messaging, implementing idempotent processing and optimistic concurrency controls for transaction integrity.
- Secured APIs using **JWT**-based authentication and built an administrative dashboard for account and transaction management.

Gulf Coast

React, TypeScript, TurboRepo, PNPM, TanStack Router/Query/Table, Tailwind CSS v4, Zod

- Developed a **monorepo**-based platform supporting 6 operational roles and multiple business workflows, including workforce allocation, inventory management, and scheduling.
- Standardized API consumption and validation through shared utilities and **Zod** schemas, improving data consistency across applications.
- Implemented advanced tabular interfaces featuring **sorting**, **filtering**, **pagination**, and scheduling views for operational planning.

Sentiment Product Review Analysis

Python, Scikit-learn, Pandas, NumPy, NLTK, TF-IDF Vectorization, Matplotlib, Seaborn

- Built an end-to-end **NLP** pipeline – tokenization, **TF-IDF** feature extraction, and **ML** model training – to classify product reviews by sentiment.
- Improved classification accuracy through iterative **feature engineering** and hyperparameter tuning; evaluated results with **Matplotlib/Seaborn** visualizations.

Education

Chitkara University

Punjab, India

Bachelor of Engineering in Computer Science and Engineering

Aug 2022 – Jun 2026
